INTRODUCTION

This bibliography has been prepared to provide students, research organizations, libraries, development councils, associations and groups with information on economic reports produced by various Ontario government departments. It is hoped individuals working in economics and related fields will find this bibliography a useful source of supplementary reference material.

Individual departments were requested to submit lists of major reports (bearing some relation to the broad field of economics) which have been produced in the past two years.

The reports which have been grouped by department are indexed according to subject matter on page 28.
